A Unique Mining Camp

Every once in a while a new mining discovery is made in Nevada and in practically every case a stampede results. In the greater number of cases it is tales of high grade ore that serve as a magnet to attract outsiders and practically every camp discovered in years has been of the high grade variety.

Republic, the new camp northwest of Tonopah is somewhat different from its predecessors. This camp claims distinction as a low grade proposition, although high grade ore is to be found in several places. The unique feature of the camp speaks well for its future. There is no doubt but that Republic will become an active district, producing pay ore in quantity, and appearances indicate the erection of a mill in the district before any great length of time has elapsed.

Charity That Is Not Charity

Official charity is notoriously a cold proposition, but the Marysville Appeal tells of a case which makes one wonder what charitable institutions are for. A young man in Yuba county was stricken with paralysis a few years ago and became helpless. He could neither walk nor speak and became a county charge. He was eventually taken to the county hospital, where he remained two years, but a few days ago he was dismissed for breaking one of the rules of the institution where he is given two meals a day and a place to sleep. He is only twenty-six years old, a physical wreck through no fault of his own and is utterly cast out.

The Appeal tells this unfortunate's story at length, and it is a pitiful tale; but, true to its name, the Marysville paper made an Easter day appeal for the forsaken creature, which, it may be hoped, brought some help to the human wreck who "broke a rule of the county hospital."

Such cases are not uncommon. Charity stands upon rules and ceremony and is wound around with red tape. If the unfortunate who need charity came up to the standards demanded by dispensers of the official article they would never be in need of it. Charity is not charity unless it covers a "multitude of sins."

King George's Assassin

When King George of Greece was murdered in the streets of Saloniki, the dispatches described his assassin as "an evil looking fellow of low mental type," named Aleko Schinas. Now it transpires that Schinas is a man of an altogether different type. He lived for some time in New York City, where he was employed as a pantryman in a large hotel. A fellow workman describes him as a man of intelligence and very well educated. He could speak Greek, English, Italian and French fluently, and "there was nothing on the subject of Socialism that he had not read." His talk was all of kings and governments and his leisure was spent among those who did nothing but denounce authority.

There are as many kinds of Socialism as there are varieties of apples. There is the German conservative kind, which is tolerable. There is the George Bernard Shaw brand which is amiable. There are various other kinds descending in the scale until we get down to a sort which is so closely allied to anarchy that an expert cannot tell the difference.

The assassin of the king is simply an anarchist who may have begun as a Socialist, but who ended by hypnotizing himself into the conviction of the anarchist that murder is the road to "equality and liberty."

Two Great Disasters

The calamity in Nebraska and the still greater one in Ohio sink the San Francisco disaster of 1906 into insignificance. The combined losses of property at Omaha and Dayton reach a tremendously higher figure than was incurred in the California city, while the loss of life in San Francisco bears no comparison to the awful tragedies that have just occurred by the storm and flood.

The number of lives lost at Omaha is finally estimated at about 200. The number lost by the floods in Indiana and Ohio cannot yet be determined, but it is estimated at from 1500 to 2000. When all the details are known it is probable that the Ohio floods will be found to have been the greatest disaster in the history of the United States. The loss of life may exceed that of the Johnstown tragedy, when 3000 went down in the swirling flood. More news is to come from the smaller towns in the Miami valley, above Dayton, before the toll can be made up. There have been serious losses of life and property in places like Sidney, with 6000 population; Piqua, with over 13,000; Try, 6000; Franklin and Miamiburg, with 5000 each; Middletown, 13,000, and Hamilton with over 35,000. Small villages by the score must have suffered in proportion. The final total has not yet been counted.

The greatest destruction appears to have been caused by what is

known as the old Lewistown reservoir, above Dayton, a primitive construction built eighty years ago to hold water for the operation of a canal. It was an enormous affair, never strong, long out of use, neglected and almost forgotten except by the hunters and fishermen who frequented it. The stress on the earthen dam finally became too great and it gave way to a sudden thaw and the rapid rise of water. The lesson of the Johnstown flood had been forgotten.

COMMUNICATION

Editor Bonanza: The subject of Socialism seems to be all the talk in Tonopah just at present, with Father York, Stitt Wilson and five other socialist lecturers to be held within the next two months. It has got me into several arguments and disputes about the vote cast in Tonopah, so I am writing you to find out the facts. What was the official vote of Tonopah for the four leading presidential candidates? Will you please publish it in your paper; it won't take much space and I'm sure it will be appreciated by a great many in Tonopah.

Thanking you, I am yours truly,
CARL MARSHALL.

The presidential electors of the four principal parties received the following Tonopah vote:

Republican—McGill, 224; Nelson, 224; Booth, 229.

Democratic—Thatcher, 493; Allen, 487; Cazier, 486.

Socialist—Robb, 503; Hibbard, 502; Flak, 500.

Progressive—Hatch, 234; McCarthy, 225; Way, 224.

BACKACHE IS A WARNING

TONOPAH PEOPLE SHOULD NOT NEGLECT THEIR KIDNEYS

Backache is often nature's most frequent signal of weakened kidneys. To relieve the pains and aches, to remove the lameness when it arises from weakened kidneys, you must reach the cause—the kidneys. If you have pain through the small of your back, urinary disorders, headaches, dizzy spells, or are nervous and depressed, start treating the kidneys with a tested kidney remedy.

Doan's Kidney Pills have been proved good and are especially for weak kidneys. Doan's have been used in kidney trouble for over 50 years. Here is convincing proof of merit. It comes from this locality.

W. T. King, W. King st., Carson City, Nev., says: "I suffered so severely from backache that I could hardly stoop. Doan's Kidney Pills were the only remedy that had an effect on my trouble, and I am glad to say that they made a complete cure."

For sale by all dealers. Price 50 cents. Foster-Milburn Co., Buffalo, New York, sole agents for the United States.

Remember the name—Doan's—and take no other. 5-adv.
